Job Overview:

The ideal Arborologist with Rainbow Treecare Scientific is someone who has achieved a high level of knowledge in arboricultural and has spent time as a practicing arborist, a teacher, and writer. The position's purpose is to develop professionalism within the arborist community and involves the mentorship of practicing arborists in the field of tree health care. The successful candidate must have a passion for trees as well as the ability to apply knowledge to diverse urban forest ecosystems. Must enjoy traveling and forming relationships with others.

Responsibilities:

- Teach arborist tree health practitioners how to be successful in prescribing and communicating tree treating protocols that get predictable results.
 - Partner with Arborists and facilitate demonstrations on protocols and best practices.
 - Educate the Green industry stakeholders on latest protocols and best practices
- Public speaking to various sized groups of professionals.
- Responsible for the success of a group of products and protocols being widely accepted and utilized by arborists nationwide.
- Advise clients appropriately and with integrity, able to transfer knowledge in such a way that the audience/clients can turn into action by applying the science.
- Developing and implementing strategies for maximizing outreach opportunities.
- Develop innovative and actionable methods of working with clients to solve tree and shrub problems unique to their ecosystem.
- Set up small scale demonstrations and research trials with a broad group professional individuals and company partners.
- Deliver effective conversations reinforcing the Rainbow Treecare Scientific Advancements values
- Demonstrate capacity and willingness to stay abreast of cutting edge science.
- Insure all literature, web, seminars, etc. have complete integrity and thoroughly represents all positives and negatives for each protocol so that expectations of the client are clear.
- Establishes and manages effective programs and seminars to address concerns and/or breakdowns.
- Write three (3) Industry articles (published) annually in area of expertise.
- Maintain a high standard of excellence and integrity.
- Travel required approximate 50% or approximately 70 – 80 nights per year
- Hold self-accountable for results
- Listen with objectivity and check for understanding

Position Requirements –

- Requires a BS, MS, PhD, OR 5 + years of industry experience in the field of arboriculture consulting, research, or tree health care services
- Hands on experience with tree health care products (protocols) and equipment.
- Technical knowledge in the areas of science, diseases, insects, chemistry, plant physiology or proficient at learning these areas because of previous experiences.
- Strong communication skills: ability to conduct effective conversations with our clients, and arborist practitioners.
- Will require considerable studying of associated areas such that mastery is obtained.

Job Specific Knowledge & Skills:

- Creative problem solver, critical thinker, skillful at speaking and listening.
- Effective presentation and writing skills.
- Excellent oral and communication skills (public speaking)
- Be able to effectively conduct webinars.
- Excellent PC and Internet skills, including experience using Microsoft Outlook, Word, and Power point or Apple related programs
- Social drive and seek opportunities
